

TEEN SCREENS

95% of 95%

of computer projects require no computers or skills to use them. Creating bulletins, video or powerpoint presentations, reports, websites, etc. are mostly the creating, qualifying content, coordinating, and the on-screen delivery. I've personally spent years, proving to myself that a keyboard, mouse, and spell checkers hinder one's front-end creativity. Therefore...

Set Free Your Student's

...imagination, pent-up questions, and hunger to be heard, by using magic markers (never crayons), paper, poster board etc. to compose your project. This is a good way to introduce the rest of the church to a student's world.

Wanna Surprise?!!

Silver-haired folks are just crying for a project that uses kids, but not workin' computers. Ask them to help. They're great listeners too !

=Websites for churches and missionaries

=Powerpoint presentations

That teach Bible principles

Junior church quizzes with funny sound effects.

Experiment with creative ways to use animation & motion

=Make a database that shows leftovers in the church: space, furniture, talents, time, etc.

=Make a sketch of the church floor plan and how you think it could be used better.

Trustees will really be interested in them.

=Create scripts for videos of a teen's world.
